OUTMOD (ANS, JTB, JDATA, JNE, LSTAT, IEOD, IPTYPE, LUSE)

OUTMOD controls most of the output for VGRANL. Actual output is done in the called subroutines.

ARG      DEFINITION
ANS      ANS array.
JTB(6)   Time array.
JDATA(512) Digital current array.
JNE      Number of measurement per cup.
LSTAT    Status word.
IEOD     End of data flag.
IPTYPE   Type of input tape.
LUSE     Use flag.
